Pappinbarra Progress Association

July 2015

Valley Happenings

July First Friday get-together and barbecue is on 3 July from 6 pm at Hollisdale Hall, Pappinbarra Road. Come along, be made welcome, and meet your neighbours! Vegetarian and gluten-free options included in a tasty low cost menu. Soft drinks available. BYOG.

June First Friday saw Tom Cowen win the members' draw in absentia, while raffle winner, Gary Rainbow chose the Greenbourne Nursery voucher. Thanks to George Hegarty for his culinary efforts on the barbecue with assistance from Sue Frost and Jean Hegarty. To all who were there for the set up and clean up - thank you - your help is really appreciated.

Basic Photography Workshop at the hall on 11 July. Progress from using your camera on auto! Contact Deb Murrell to register mardeb@bigpond.com or 0408 227 028. Numbers limited to 6; first in best dressed. Cost \$70 includes hall hire and a follow-up session.

Bushed the movie (on flash drive) for sale \$15 at First Friday (covers cost of flash drive plus a donation to Anton Visser towards production costs).

Pappinbarra Craft Corner Wednesday 15 July at *Oakvale*, 1024 Pappinbarra Road from 7.30 pm. Bring your own craft or knit something for refugees. Enquiries Heather 0419 466 005.

All Saints' Pappinbarra, our little historic church, welcomes all to the service on Sunday 26 July at 2 pm with a cuppa around 2.45 'off the back of the ute'.

Pappinbarra Rural Fire Brigade AGM on Saturday 27 June, 10 am at the Pappinbarra fire shed. Hollisdale RFB members are invited to join the training session after the meeting.

Hollisdale RFB AGM 3 August 7.30 pm. Training on Saturday 4 July 8-10 am. Meet at the hall in full uniform.

Hollisdale Hall, owned by the community, is available for community use - \$30 members and \$50 non-members plus \$50 bond. Fees go to maintenance, gas and electricity. Book with George Hegarty 65 876 077.

Pappinbarra Progress Association Inc.'s AGM

Saturday 11 July, 2 pm
Hollisdale Hall

Come along, hear what we have accomplished in the past year, vote, and have your say on future initiatives. Your president is retiring after a three-year term. Nominations for president, secretary, treasurer and committee members should be made on the slip provided and brought to First Friday or sent to Suzanne Pollett at 23 Pythonwood Road (RMB on Pappinbarra Road) by the 4th of July.

2015/16 PPA memberships now due.

To all who were there for the set up and clean up - thank you - your help is really appreciated.

A great night was enjoyed by all who attended this year's Bush Dance. See pg 6 for the run-down.

Meet the neighbours: Harold Stokes and Alicia Gestal

Harold was born in Melbourne; he has one sister who is 8 years older. His parents were country folk who moved to Melbourne shortly after he was born because of his mother's health issues.

Harold lived in Melbourne until he was 25. Having completed school at Melbourne High, he then went on to Monash University where he did an undergraduate degree in Science and then did his PhD in Genetics and Microbiology, finishing in 1980. He then spent two years doing scientific research in New Jersey USA before moving to the University of Connecticut where he taught as well as doing research. He married during this time.

Wanting to be a pilot, Harold had taken private flying lessons during his time at Monash. He discovered he was colour blind so couldn't become a commercial pilot, but he and his wife purchased a small single engine plane which they flew from the USA back to Australia together in 1985. Quite an adventure!

On his return to Australia, Harold took up a position at Macquarie University doing research and teaching. He held this position for 23 years. In 2008 he moved to the University of Technology, Sydney. His Australian research played a significant role in determining how disease-causing bacteria become resistant to antibiotics. He retired in 2013.

Alicia was born in Montevideo in Uruguay where she lived until she was 20. She completed her schooling there and then did two years in Medical School. Her parents wanted to escape the political unrest in Uruguay and her father got a job in Australia in 1974. Alicia refused to go with them, and married Juan Carlos instead. She was a strong-minded political activist, opposing the military junta and in 1976 it became imperative that she also escape Uruguay, so she came to Australia with her husband.

They arrived in Sydney with no English and no job. They were both awarded scholarships to take English as a second language at the University of NSW. After two months it was time to get a job, so Alicia began working as a cleaner at Prince of Wales Hospital. She saw an advert for nursing, applied and started her training in 1977 and became a Registered Nurse in 1980 working mostly in coronary care and emergency.

In 1982 Alicia had her first child and by 1985 she had three boys, so gave up work to become a stay-at-home Mum. As well as raising the boys, Alicia did a part-time Science degree from 1993 to 1999. She then separated from her Husband and started her Master's while also working as a nurse around Sydney's major hospitals. She later found a permanent position at the Sydney Adventist Hospital, Wahroonga.

Harold was Alicia's supervisor during her Master's. Her research

involved collecting samples of human faeces (yuk) from hospital admissions to study normal intestinal bacteria for the presence of antibiotic resistance genes. Things did not go well from the start and Harold described Alicia as a 'pain' because she was too tidy - a trait he has since come to love! He even threw her out of his laboratory once for persistently moving a microwave oven (what a brave man!) She then realised that Harold had a wicked sense of humour and gradually started to like him. She fell in love first with his legs as they flashed past her when he was out running!

Alicia commenced her PhD in 2007 at the University of Sydney in the same line of research as Harold, so they constantly kept in touch attending the same conferences and then their romance blossomed. They finally got together in 2010 and Alicia completed her PhD in Microbial Genetics in 2012. In 2013 they both decided they wanted to get out of the fast lane and live on the land. They looked at several places from Cooma to Gloucester but finally discovered our beautiful Pappinbarra Valley. They only looked at one property here and it was love at first sight.

In February 2013, Harold and Alicia had just emptied the removal truck when the rain started falling. Of course, as luck would have it, the truck got stuck so they flagged down a passing farmer with a 4WD and were towed out. The next day the river flooded and, as they had no power, no water, no gas and no phone they beat a hasty retreat back to Killcare on the Central coast whence they had come. They returned when the rain stopped.

Their five acres of paradise has a delightful mud brick house, 200 metres of river front, a veggie patch, olive trees, fruit trees, a massive wood fired parrillero (a South American BBQ), a pergola, soon to be finished for evening 'Drinkie Poo's' and a gorgeous secluded swimming hole.

So if you are passing *La Chacarita* (look for the sign at the gate) on a warm summer day and decide to drop in, give a loud Yoo-hoo, just in case Harold and Alicia are swimming naked in their secluded stretch of river!

Kendall Horticultural Speakers Day

Sat 25 July 10am - 3pm

Gardeners Speakers Day at Kendall School of Arts. We have four speakers.

Frith Peters from Comboyne - now, she can get her hands really dirty! She and Alan built and ran Blue Poles Gallery at Byabarra, sold it and moved out west to Wellington for 10 years, sheep and all that. After winning the 2011 ABC National Gardener of the Year, they are back. Frith will anchor her talk on the difficulties between gardening in a dry climate versus hints to get the best out of one's garden in this coastal/subtropical climate. Her talk 'Gardening's a piece of cake' with tongue in cheek, says it all.

And surely many of you have met Harry Rose - the good and the bad grasses man. He doesn't even know his hands are dirty, but he'll hold you all in his capable, clean hands, with his talk 'Grasses

Hey all you people with dirty hands! Why not give them a wash and come to Kendall District in landscapes - destruction and beauty'. He'll have you seeing grasses as 'the dancers' in your garden.

Angela Millett hails from Port Macquarie, is very handy and has a passion for fungi with their weird and wonderful forms and colours. In 'An introduction to fungi' she will show us how fungi feed, heal, protect and possibly kill us.

Kath Gadd (haven't seen her hands) comes from the Illawarra district and will talk about 'Garden design with native plants'. Believing native as well as exotic plants can be used in all garden design styles, she discusses the distinction between unity and repetition, mass and void, natural habitat and spirit of the existing space, in a very practical way.

Morning tea + four Speakers is \$15 pp. Plus the option, an extra \$15 pp, for a hot luncheon and dessert. Book early for lunch at 6559 0055 or 6556 9615. Plants, native bee motels, rainforest trees and grasses for sale so come early. There was standing room only last time.

Richard Cullen

Soils are officially sexy

Recognising that soil is a non-renewable resource and its preservation is essential for food security and our sustainable future, the United Nations Food and Agriculture Organisation (FAO) has dubbed 2015 International Year of Soils.

Farmers on the Mid North Coast, with the help of Landcare and North Coast Local Land Services have demonstrated that improvements in soil health increase our resilience to floods and drought. In May this year, nine farmers throughout the Hastings, Macleay and Nambucca established small-scale trials of sustainable soil management practices.

The ingenious and creative approaches to soil health improvement by our farmers are inspiring. Of course we will have to wait to see the results of the soil improvement trials, but we are confident that the kind of low-input management our farmers are trialling will guide the future of farming sustainably on the mid north coast.

Healthy soils are the basis for healthy food production and healthy farming communities, but how do we go about negotiating the minefield of agricultural inputs and how do we begin to build soil health?

These are the questions that Agricultural Ecologist **David Hardwick** (pictured) will help farmers to answer through a series of workshops in the Hastings, Macleay and Nambucca this month. David has a reputation for interactive and informative workshops and we have invited him to guide us through the vast range of fertility inputs. His Hastings workshop will be held in Beechwood on Wednesday July 1 and will deal with input pros and cons.

Contact your local Landcare Office on 65 864 465 to book for this inspiring workshop.

Bird of the Month: Superb Lyrebird

Scientific Name: *Menura novaehollandiae*

Size: Males 80 to 100 cm including 55cm tail; females slightly smaller.

Other Names: Native Pheasant, Lyretail.

Status: Secure in all NSW, VIC & TAS. Near threatened in QLD.

Male Superb Lyrebirds perform incredible song and dance routines from display mounds during late autumn and winter trying to attract females with which to mate.

Both sexes are similarly coloured, being a darkish brown above and a lighter brown to creamy buff below. The mature male has a tail constructed of two outer feathers coloured black and rufous in a notched pattern with many lacy filamentary plumes between. The tail is spread, inverted fashion over the back of the displaying male, showing as a lyre-shaped silvery veil.

Female and juvenile birds have a much plainer brownish tail, with juvenile males developing the large tail structure over several years. They also have rufous throat patches not evident in older males.

Superb Lyrebirds are found from SE Queensland and down along the eastern ranges to the Melbourne area. They were introduced to Tasmania in the 1930s. Inhabiting both dry and wet

forest, they feed exclusively on the ground, scratching up leaf litter and decaying vegetation to find all sorts of insects and worms. They do not exhibit any seasonal migration.

The voice is strong and fluid and vocal phrases such as 'blik-blik' and 'whisk-whisk' along with the ability to mimic many of the bird species around, form long vocal renditions that can be

heard over some distance. Lyrebirds often mimic man-made sounds they regularly encounter like axes and chainsaws! Female birds also sing, however not as strongly as males.

During the display and courtship period from May to August, the male may mate with several females. The female alone carries out all nesting duties. She constructs a domed nest with a side entrance. The nest is made of sticks and twigs and lined with finer plant material and feathers and is situated in a rocky crevice, a tree fork or stump or in the head of a tree fern. One egg is laid and incubated for 40-45 days. The young bird stays with the female for several months.

For further information or questions relating to this or other species contact can be made through this email address peter_fac@yahoo.com.au

Peter Fackender

Editor's note: The lyrebird performance sent with your e-Pitchfork (or available by email from Angela Frost) was recorded by Peter at Macquarie Pass National Park in the Illawarra. It sounds different from the local ones. Peter has heard a lyrebird at Pappinbarra mimicking a human whistling! I wonder who? He says the songs vary from place to place as well as seasonally, while Tasmanian lyrebirds still mimic birds not found on the island.

Rural Fire Brigade News

It's AGM time again - Pappinbarra RFB on tomorrow 27 June at 10 am at the Fire Shed and Hollisdale on 3 August at 7.30pm.

All is quiet on the fire front; we just need the sun to shine for a while to dry things out. Congratulations to Mark Durham and Pete Michael on completion of their crew leader course and George Hegarty - advanced firefighter course. Geoff Carson just has one module to do. Hollisdale brigade are invited to join Pappinbarra for training after their AGM.

Critter of the month:

Thylacinus cynocephalus

The Tasmanian Tiger, or thylacine, was illustrated and described in the 1863 publication *Mammals of Australia* by John Gould of bird fame. Tasmanian colonists called it variously Tiger, Hyaena, Zebra-opossum, Zebra-wolf and Dog-headed Opossum! Its species name means 'dog-headed pouched one'.

The largest marsupial carnivore of modern times, it first appeared in the fossil record about 4M years ago and was native to continental Australia, Tasmania and New Guinea, but was 'extremely rare or extinct on the mainland' before 1788.

Although it probably subsisted on small animals like bandicoots and possums, early Tasmanian settlers believed it took their lambs and poultry; bounties were offered and it was intensively hunted. It is said that the last one died in Hobart zoo in 1936.

Both males and females were pouched; the male pouch protected his scrotum, the female's back-opening marsupium contained four teats and held the young. The animals made rapid cough-like barks when hunting.

What, you may ask, has this to do with Pappinbarra Valley?

In 1946, John Shaw saw a Tasmanian Tiger just strolling across a wooden culvert below Lindsay Bird's place. His mate Cliff said, "Oh no Johnny, they live in Tasmania!" After John retired from teaching, he and Rita were living in the bush out beyond David Jones' place. He had cleared the paddocks and fenced along the top. Inspecting the fenceline, John saw one walking across a cleared area into the bush. About five years ago, he went down early one morning to do some fencing below the orange orchard. It was cleared through the fence and as he walked through the long grass John saw an adult tiger and four young all lying with their rumps towards the sun, which had just risen over Paul Hollis' place. He must have startled them - they were suddenly gone.

John says that was three sightings in nearly 70 years - all in the clear and all in winter. "The stripes were black, the animals fawn; they couldn't be anything else. Perhaps they came down from the tablelands in the cold weather."

Peter Wall saw a thylacine 'just once and didn't tell anyone about it because they wouldn't believe me'. When he was walking along in front of his house on Berecovan's Road off the Left Arm, his dog started barking like mad and jumping up and down. It had spotted a tiger, but wasn't going to chase it. The tiger ran away - 'the stretch of it!' Peter reckons there could be a population of thylacines 'in the thousands of hectares of gorge country between here and Kempsey' and says he has heard of others seeing them.

Jean Hegarty

The Bushfire Outlook

Based on model outlooks and current climatic indicators, the Bureau of Meteorology has confirmed that El Niño thresholds have been reached and continue to strengthen. This El Niño declaration is likely to cause Eastern Australia to enter a period of lower rainfall and higher than average temperatures during late winter and spring. In some parts of the state attempts by NSW RFS to reduce fuel loads through hazard reductions have been hindered due to recent high rainfall along the East Coast and floods in the Hunter and North Coast. A forecast for drier than average conditions in some areas over winter may provide

opportunities for burning ahead of drier and warmer conditions in spring.

If typical strong El Niño conditions prevail, the possible rapid drying of fuels may affect the window of opportunity to safely undertake prescribed burning. This further highlights that all opportunities to undertake hazard reduction must be taken advantage of.

The recent rainfall, coupled with the predicted warmer weather, may also result in high grass fuel loads in spring, which could increase fire danger over the summer.

The NSW RFS continues to liaise with the BoM to monitor the potential strength and duration of this El Niño event which may affect the upcoming bush fire season. (RFS Newsletter)

Times Past:

World War I takes a heavy toll—the Way family of Beechwood

Cecil was the first, Ernest the eighth and Norman the ninth child of George Cameron Way and Sarah Way (nee Richardson) who married in Wingham in 1881 and bought a farm in Beechwood about three years later where they dairied and farmed. George Way's obituary in the *Hastings Shire Gazette* of 2.3.1927 described him thus: *He was a man of decided opinions, a progressive farmer, and always interested in public affairs. A staunch member of the Methodist Church, and total abstainer.*

Cecil was born in 1882 in Port Macquarie. In 1909 he married Annie Dwyer in Ballina and as a young man, carried on a successful blacksmithing business in the Richmond River district. They raised three children named Gladys, Alf and Grace.

During the war he saw service with the 17th Battalion and received injuries so severe at Bullecourt that his leg had to be amputated. This, coupled with lung trouble which developed as a result of his war experiences, caused much torment up to his death in 1929, aged 47 years. His obituary in the *Port Macquarie News* of 11 January 1930 stated his suffering 'was borne with great patience and cheerfulness'. A popular man, he had a wide circle of friends. He is buried at Beechwood Cemetery.

Ernest Victor enlisted in August 1917. Born in 1894, this slightly built young man was 23 and employed as schoolmaster at Camino Central School in the Richmond River when he enlisted at Grafton.

He was appointed to Engineer Reinforcements and, after a stint at No 5 Equitation School at Roseville in Sydney, headed for England on HMAT *Persic* A34 in March 1918. In June, Ernest was admitted to Colchester Hospital with 'influenza enteritis' and his parents were advised by telegram that he was seriously ill. He spent weeks in hospital in Colchester and Harefield, and was

finally discharged in mid-September to Brightlingsea. After the fighting had ceased, Ernest, still in the army, went on a Teachers' Tour, returning to Australia in August that year.

Sarah and George's ninth child was **Norman Douglas**, born in 1897. He was 21 when he was killed in action in August 1918. He had enlisted at the age of 18 years, and was attached to the 1st Battalion. He just missed the Gallipoli campaign, but saw much service in Egypt and France. He participated in all the severe fighting on the Somme in 1916, and in November of that year received wounds so severe as to prevent his return to his battalion until October 1917. He was in the line until his death except for a spell of a few days, which he spent in Paris. The *Port Macquarie News* of 19 September 1918 stated: *Comparatively few soldiers see as much actual fighting as fell to the lot of this brave young Australian. It can be confidently asserted that no lad in the district was more highly respected than "Normie" Way, and his untimely end will be deeply regretted.*

While Cecil, Ernest and Norman were overseas, their younger brother Roy, aged 19, drowned in the Hastings River three days before Christmas in 1917. He suffered from 'fainting fits' and is thought to have knelt down to drink from the river, fainted and drowned.

Three cousins of Cecil, Ernest and Norman - Samuel, Eric and James Wilson, enlisted in August 1915 and all three became part of the 53rd Battalion. Samuel and Eric were killed at Fromelles in July 1916. James was wounded in the neck and sent to hospital in England. He returned to Sydney in 1919. He married and had a son and became a successful businessman in Sydney, then Tweed Heads. Another cousin, John Morris was to enlist later.

Sarah commissioned an Honour Roll, currently held at the Wauchope District Historical Society. She died shortly after its completion and is buried at Beechwood Cemetery with her husband. Their family, both immediate and extended, paid a devastatingly high price in the fight for freedom in Europe.

Mary Wagg

Bush Dance An enthusiastic crowd braved last Saturday night's cold to attend our annual bush dance and enjoy a great night of dancing. Russell Churcher was his usual brilliant self, supplying great music and expert guidance for the country dancing. Russell soon had everyone up and dancing and forgetting the cold night – the kids who came really enjoyed themselves and were most impressive.

As well as dancing, everyone enjoyed the delicious soups, sausage sandwiches and the mulled wine – just the thing for a cold evening. Many thanks to Michéle, Chay and Mary and Lisa

for organising the food. Thanks also to Mary, Suzanne and Angela for helping set up – the hall looked great with its new dimming lights – thanks to Darren for getting those finished in time for the dance.

Special thanks goes to the Port Macquarie Hastings Council for the funding grant which enabled us to engage Russell and make this a special night.

In the **vege** patch

Gardeners looking at which manure to add next, whether it's cow manure or fowl manure even mushroom compost, have lots to choose from, but why not try Searle's 5in1? This is a blend of manures and composts boosted with blood and bone, potash, fish and kelp. It's a complete organic plant food great for a mid-season boost. Use as a soil topdress or dig through 4 parts soil 1 part 5in1. Water in and watch the plants grow.

Why not try something different? Plant on a fence or a bare wall. Perhaps grow some peas on wire along the fence or purchase a vertical garden planter and fill with some herbs, perfect for near the back door.

Happy Gardening, Brendan

Editor's musings...

I recently enjoyed three sessions of the Sydney Writers' Festival, beamed into the Glasshouse at Port for the edification of us country-dwellers. It was better than being at the actual Festival, as it was free, parking nearby was easy, and the trip to Port took just 45 minutes!

Kate Grenville was interviewed about her latest book - a memoir based on notes her mother wrote throughout her unusual (for the time) life. Kate's 2005 novel, *The Secret River*, based on the lives of her (and my) gt-gt-gt-grandparents, has just been dramatised on ABC TV. It was quite eerie watching the family settling on the Hawkesbury knowing that, in all probability, that is pretty much how their lives panned out there.

Don Watson, former speechwriter for Paul Keating, spoke about his 2014 opus, *The Bush: Travels in the heart of Australia*. This was spell-binding, the hour flying past, leaving me desperate to get hold of the book, which I ordered at 'Bookface' just round

the corner. A week later I had it in my hot little hands, full of anticipation at the treat in store. I wasn't disappointed.

Speaking of his ancestors, selectors in the Gippsland forest ('scrub', although the mountain ash trees reached skywards a hundred metres), Don spoke of 'the daily contest with nature', started with the axe, the saw and ringbarking, pursued with zeal till only the trees in the gullies remained. 'A few of the native birds went on singing after their forest was gone... lyrebirds still lived in the gullies: lyrebirds because the fabled instrument of antiquity bears such a resemblance to the tails male lyrebirds have been sporting for 15M years. In that time, to go with their regalia, they developed a coordinated song and dance routine, with set steps for each of the four songs they sing in succession.

'From the front veranda on a clear, still morning, my mother remembers hearing lyrebirds in a nearby gully. The birds began with their own brilliant song, followed by imitations of other species - bowerbirds, whipbirds, wrens, magpies, flocks of parakeets, and, the most uncanny and spectacular, the kookaburra. These birds they had been imitating for millennia, but now they added to their daily routines the notes of saws and axes and the whistle of the train.'

In the Depression, 'a new paper mill offered money for the giant eucalypts still standing in the farmers' gullies.' Along with the tall hardwoods, trees, the shrubs and undershrubs, tree ferns, ground ferns, lichens, mosses and fungi, the marsupials, monotremes and reptiles all vanished. 'The farmers and their families never heard the lyrebirds again and never saw them.'

As I write, lyrebirds along the Pappinbarra are in full song.
